TRAVEL ADVISORY - SUMMER 2014

PORTION OF CEDAR LANE AT ROCKVILLE PIKE IN BETHESDA TO BE CLOSED FOR CONSTRUCTION

MARYLAND 355

On Friday, June 6, the State Highway Administration (SHA) must close a 1000-foot section of Cedar Lane between Elmhirst Parkway and MD 355 (Rockville Pike) in Bethesda, Montgomery County. Weather permitting, this section is expected to reopen no later than Friday, August 22.

The temporary summer closure is necessary for MD 355 / Cedar Lane intersection improvement project. Crews will build a new entrance at Cedar Lane and Elmhirst Parkway for the Stone Ridge School of the Sacred Heart, install a new traffic signal, and replace aging pipes underneath Cedar Lane within the work zone.

DETOUR: To complete this phase of work, SHA will redirect traffic around the work zone on Cedar Lane 24 hours a day, seven days a week via the approved detour route of MD 355 (Rockville Pike), MD 547 (Strathmore Avenue/ Knowles Avenue) and Summit Avenue. Motorists should plan ahead and add extra travel time.

Electronic message boards will advise motorists about the temporary closure of Cedar Lane. Pedestrians will be directed to safe crossing areas via orange construction signs, cones, barrels and fencing. Residents and travelers are advised that construction equipment may be loud and disruptive. SHA thanks area residents and commuters for their patience and cooperation as crews complete this phase of work. **More information is available at www.roads.maryland.gov/D3.**
