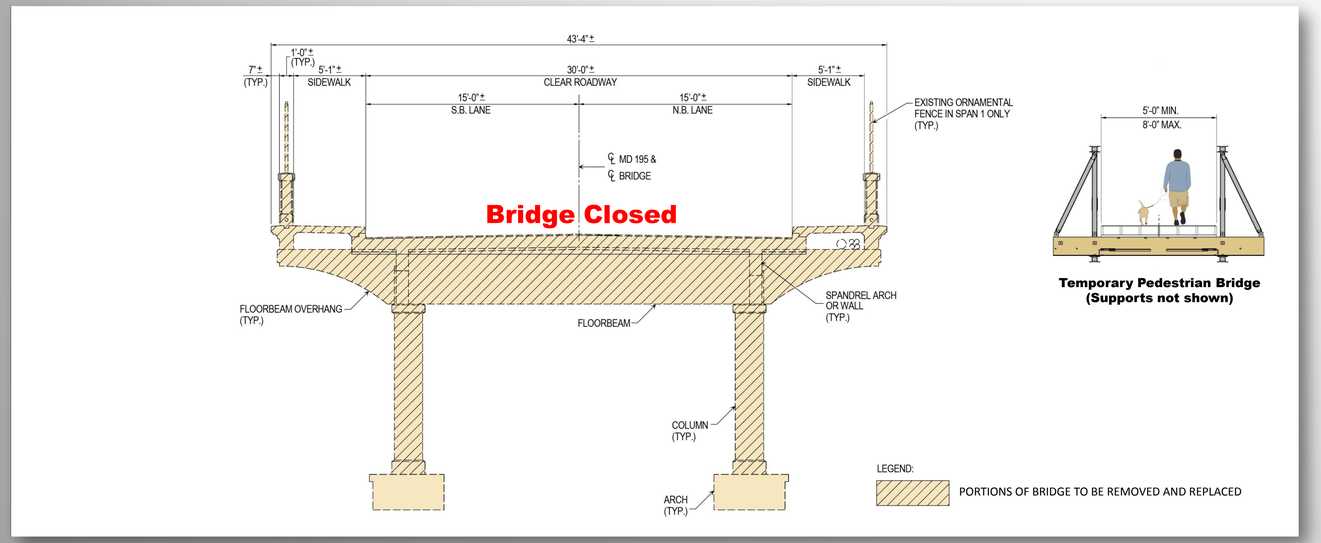
Carroll Avenue Bridge Project

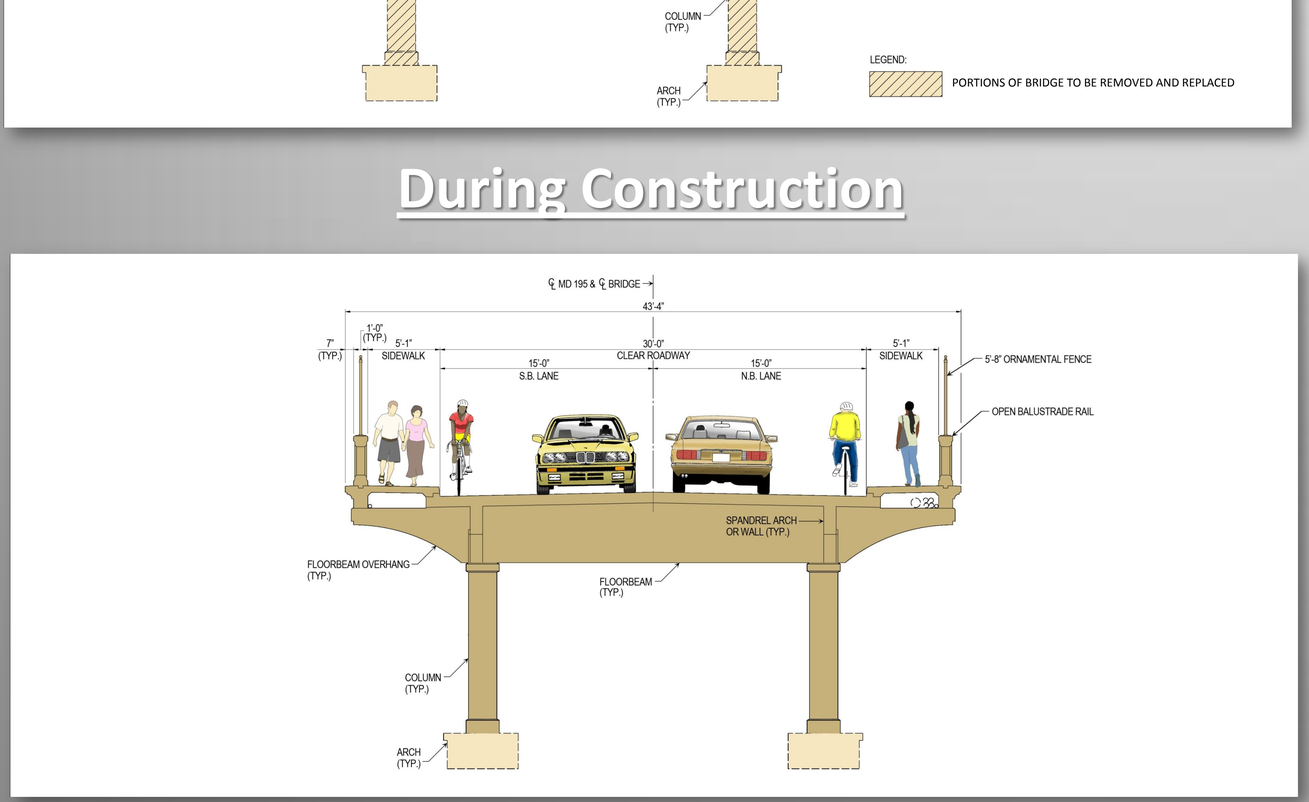
MARYLAND
195



Temporary Pedestrian Bridge (Supports not shown)

Photo show a temporary pedestrian bridge being used on Motter Avenue over US 15. A similar type structure will be specified for this project.

During Construction



Photos show reconstruction of a similar type bridge on US 40 over the Patapsco River. The Carroll Avenue Bridge reconstruction will be similar in nature.

After Construction is Complete

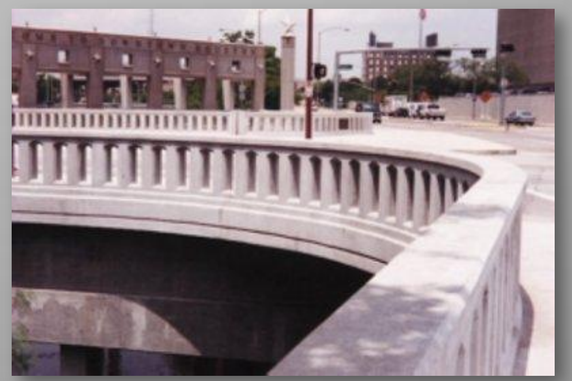


Photo shows example of new concrete open balustrade railing which will match as closely as possible the current configuration and meet the latest safety criteria.
