SPRING 2016**

PROJECT DESIGNS UPDATED; PUBLIC MEETING SCHEDULED

The Maryland Department of Transportation’s State Highway Administration (SHA) has reached 30 percent design completion on the MD 64 Drainage Improvement Project in Chewsville, Washington County. The project extends from Little Antietam Road to MD 804B. The project will help alleviate issues with flooding within the town of Chewsville.

For additional information, you are invited to attend a public Workshop on Thursday, June 9, 2016. The informational meeting will update the public about the project’s status and engineering design and provide attendees an opportunity to discuss project details. Maps and displays will provide an overview of the proposed improvements and SHA representatives will be available to answer project-related questions. **There will be no formal presentation.** You may arrive at any time during meeting hours and walk through the display area at your own pace. *(See back of newsletter for meeting details.)*

PROJECT PURPOSE AND SCOPE

The project area of MD 64 has a long history of drainage issues and flooding within the town of Chewsville. The purpose of this project is to improve the existing drainage system along MD 64 and MD 804B to reduce the amount of stormwater run-off from flooding the town.

Proposed improvements include:

- Construction of storm water management ponds along MD 64
- Installation of new drainage systems along MD 64 and MD 804B to include new open drainage ditches and closed pipe systems, manholes and inlets.

PROJECT SCHEDULE

Complete design phase.....Winter 2016
Begin construction..... .Spring/Summer 2017
