PROJECT UPDATE

The I-70 Phase 2D project is in its 28th month of construction.

Construction activities completed in June included installing excavation supports, excavating, forming, and pouring concrete for the footer of the pier (central support) for the widened I-70 bridges over South Street.

Construction activities scheduled for July include completion of the base asphalt for the widened I-70 east of the bridge, continued construction of the pier, and storm drain installation along South Street.

Construction activities for August include continued pier construction and installation of guardrail. Project completion is anticipated by the end of 2013, weather permitting.

For everyone's safety, please drive carefully, stay alert and reduce speed when traveling within the project work zone.

We request that the public not trespass in construction areas.
