1. IS PROJECT IN SCOPE? * If No, Project is automatically in non-compliance.	Y	N	N/A		
* 1.1 Have all appropriate permits and approvals been obtained (SHA/Contractor)?	\sqcup				
* 1.2 Are specified LOD, wetlands, buffers, jurisdictional waters, floodplains and/or tree protection areas demarcated and disturbed areas contained within the LOD (active work areas)?					
* 1.3 Is the project in conformance with the E&S plan, schedules and contract documents?	\vdash \vdash	\vdash \sqcap			
1.3.1 Are sediment controls in place prior to disturbing areas of intended control?	Ħ	H			
1.3.2 Are controls removed with QA program approval?	Ħ	Ħ			
1.4 Have all changes been approved to date including stream crossings/diversions?					
1.5 Have approved changes been implemented?					
1.6 Are the ESCM duties in compliance with specification 308.03.03?			\Box		
1.7 Are stockpiles/staging/waste areas approved?	屵	H	 		
1.8 Is grading limited to maximum grading unit?	ዙ	H	$+$ \vdash		
1.9 Are roadways clear of sediment?1.10 Are contractors daily reports are up to date and reviewed by the SHA inspector?	╁┼┼	╁┾┼	╁╫		
1.11 Are the contractor operations in sequence with the approved plan?	╁┼	H	$+$ \dashv		
1.12 Is the SWM as-built inspector on-site during the construction stages of SWM BMP's?	Ħ	愩			
1.13 Have the as-built plans been accepted and construction completed prior to NOT submission associated with	П		П		
NPDES	ഥ	╙	↓ ⊔		
NPDES - The following question are also applicable when the project has 1 acre or more of disturbance	├ ─	 			
1.14 Is trash/litter from work area contained to prevent discharge to surface waters?1.15 Are washout facilities (concrete, paint, etc.) clearly marked, maintained and wash water properly contained?	┝┼┼	H	$+$ \vdash		
1.15 Are washout facilities (concrete, paint, etc.) clearly marked, maintained and wash water properly contained?1.16 Are fuel containers and vehicle maintenance areas free of spills, leaks or any other deleterious material?	╁╬╌	╁┾┼	╁╫		
1.17 Are materials that are potential stormwater contaminants stored inside or under cover?	Ħ	Ħ	+H		
1.18 Is there evidence of the discharge of significant amounts of sediment to surface waters, or conveyance systems leading to					
surface waters?	ᆜ	닏			
1.19 Have required notifications (to MDE) been complied with? (Triggering Event, Upset, Bypass)		ļШ			
Definition of significant amount of sediment A discharge of significant amounts of sediment may be indicated by (but is not limited to the following. Note whether any are observed during this inspection:) obsei	rvation	is of		
 Earth slides or mud flows Concentrated flows of stormwater such as rills, rivulets or channels that cause erosion when such flows are not filtered, settled or otherwise treated to remove sediment Turbid flows of stormwater that are not filtered, settled or otherwise treated to reduce turbidity Deposits of sediment at the construction site in areas that drain to unprotected stormwater inlets or catch basins that discharge directly to surface waters Deposits of sediment from the construction site on public or private streets outside of the permitted construction activity Deposits of sediment from the construction site on any adjacent property outside of the permitted construction activity Discharges from the construction site to municipal conveyances, curbs and gutters, or streams running through or along the site where visual observations 					
show that the discharges differ from ambient conditions in terms of turbidity so as to indicate significant amounts of sediment present in the Project Engineer / Inspector: DATE:	:m
