“Tim and his team did a great job of handling the COVID-19 pandemic,” said Secretary Greg Slater. “I’m proud of them and how they handled this.”

When a pandemic hits, everything changes. Tim Lawler, OOM Fleet Manager

Looking to the future as COVID restrictions relax, he answered the question with a question: If you’re not starting a car to circulate oil and other fluids, he says. In fact, he answered the question with a question: ‘Do you have a battery charger?’ The answer was, ‘No, you can’t.’ You need to start a car to circulate oil and other fluids,” he says. In fact, he answered the question with a question: ‘Do you have a battery charger?’ The answer was, ‘No, you can’t.’

The mechanics worked hard to keep up with the demand for car repairs, sometimes working seven days a week. They also had to be careful not to overwork themselves, as the demand for car repairs was much higher than usual. The mechanics had to balance the need to repair cars and trucks with the need to keep their own batteries charged. They had to be careful not to overwork themselves, as the demand for car repairs was much higher than usual.
